When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient

Medicaid Business Segment

Medically Necessary — A service, item, procedure, or level of care compensable under the Medical Assistance program that is necessary for the proper treatment or management of an illness, injury, or disability is one that:

- i. Will, or is reasonably expected to, prevent the onset of an illness, condition, injury or disability.
- ii. Will, or is reasonably expected to, reduce or ameliorate the physical, mental or developmental effects of an illness, condition, injury or disability.
- iii. Will assist the Member to achieve or maintain maximum functional capacity in performing daily activities, taking into account both the functional capacity of the Member and those functional capacities that are appropriate for Members of the same age.

DESCRIPTION:

Pepaxto (melphalan flufenamide) is a peptide-drug conjugate that is highly lipophilic and is therefore rapidly and passively distributed into cells and then enzymatically hydrolyzed to the alkylating agent melphalan. Melphalan flufenamide's antitumor activity involves crosslinking of DNA; it inhibits proliferation and induces apoptosis of hematopoietic and solid tumor cells and (with dexamethasone) has demonstrated synergistic cytotoxicity in multiple myeloma cell lines, including melphalan-resistant and nonresistant cell lines.

CRITERIA FOR USE: Requires Prior Authorization by Medical Director or Designee

Pepaxto (melphalan flufenamide) will be considered medically necessary for all lines of business when ALL of the following criteria are met:

- Medical record documentation that Pepaxto is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of relapsed or refractory multiple myeloma **AND**
- Medical record documentation of treatment with at least 4 prior therapies **AND**
- Medical record documentation that member is refractory to at least one anti-CD38 monoclonal antibody, one proteasome inhibitor, and one immunomodulatory agent.

AUTHORIZATION DURATION: Initial approval will be for 6 months or less if the reviewing provider feels it is medically appropriate. Subsequent approvals will be for an additional 6 months or less if the reviewing provider feels it is medically appropriate and will require medical record documentation of continued disease improvement or lack of disease progression. The medication will no longer be covered if the member experiences unacceptable toxicity or worsening of disease.

Note: For Medicaid (GHP Family), any requests for services that do not meet criteria set in the PARP will be evaluated on a case-by-case basis.

LINE OF BUSINESS:

Eligibility and contract specific benefit limitations and/or exclusions will apply. Coverage statements found in the line of business specific benefit document will supersede this policy.

This policy will be revised as necessary and reviewed no less than annually.

Devised: 5/18/21

Revised: 3/31/23 (LOB carve out, Medicaid business segment)

Reviewed: 5/2/22 (Medicaid PARP statement)
